RE: Report to the Interim Finance Committee: Class Size Reduction Variances and Justifications, FY-2019 Q1 CSR for the period July 1- September 30, 2018

### Introduction

Pursuant to Nevada Revised Statutes (NRS) 388.700(4), the State Board of Education is required to submit a quarterly Class-Size Reduction (CSR) report to the Interim Finance Committee (IFC) on each variance requested by a school district during the preceding quarter; charter schools are exempt. The report must include an identification of the elementary school for which a variance was granted, as well as the specific justification for the variance.

- There are two types of CSR programs funded in Nevada:
  1. Regular CSR: Pupil-teacher ratio; Kindergarten – 16:1; Grades 1 and 2 – 17:1; and Grade 3 – 20:1. This program is currently funded through sections 15 and 16 of S.B. 544
  2. Alternative CSR: School districts which are located in a county whose population is less than 100,000 may select the Alternative CSR program which provides flexibility in implementing pupil-teacher ratios in grades 1 through 6 ( as applicable, grade 5 and 6 must be included in the elementary school to be counted) for - Kindergarten – 16:1; Grades 1 through 3 – 22:1 and Grades 4 through 6 (as applicable, grade 5 and 6 must be included in the elementary school to be counted) – 25:1. This program is authorized through NRS 388.720

In fiscal year (FY) 2019, Section 13 of S.B. 544 provides that funding for CSR shall pay for the salaries and benefits of not less than 1,968 teachers to meet the required ratios. CSR provides sufficient funds for school districts to meet required ratios at a district level. Remaining funds are allocated to the lowest performing schools with variances.

## Executive Summary

For the first quarter of FY19, there were no material changes to kindergarten variances compared to fourth quarter FY18. As a result of the discontinuation of the kindergarten class size reduction (KCSR) in FY17, the prescribed ratio decreased from 21 to 1 to 16 to 1 per NRS 388.700. Thus, the number of kindergarten class size variances increased dramatically. However, kindergarten class sizes themselves have remained relatively the same at 20.92 compared to 20.62 in Q1 FY18. Grades 1-3 however, experienced an average increase of 3% in the number of variances compared to last year. First grade experienced the most significant increase of 13.6%, and is linked most directly to Clark County School District. Grades 4-6 remained relatively flat, with an aggregate decrease of 7 variances.

### Scope of Report

Attached is the report of variances for the first quarter of FY19. The report provides a summary of variance requests by school district and includes the specific variance justification by school. For each variance request, the following information is presented:

- Class size ratios by school and grade.
- Star rating pursuant to the Nevada School Performance Framework (FY18).
- Demographic data such as, percent that is low income (FRL) and percent who are English Language Learners (EL). Figures below 10% are suppressed for student protection.

### Statewide Summary of Variances & Justifications

Variance requests are categorized into four standard potential justifications, and include funding limitations, difficulty hiring teachers, facility limitations, and other. Any or all of these justifications are accepted. Funding limitations was the most common variance justification, which was a factor in 35% of variances requested by the districts. Difficulty hiring teachers was the second most common justification at 35%, followed by facility limitations at 29%. Other was cited just 0.22% of the time.

The districts were broken into their grouping type, Large, Centralized, Rural, Small, and Very Small, according to the DSA equity allocation model definitions and were analyzed for commonalities. Clark and Washoe are grouped in the large category; Carson City, Churchill, Douglas, and Lyon are grouped in the centralized category. While Elko, Humboldt, Lander, Nye, and White Pine are grouped in the rural category, and Lincoln, Mineral, Pershing, and Storey are grouped in the small category. Esmeralda and Eureka are grouped in the very small category.

Eleven of the districts reported funding limitations as a justification for variances. In rural and small districts, they reported that funding levels did not meet the level needed to provide enough incentive to hire teachers in such remote locations. In centralized and large districts they reported not being able to offer competitive salaries to compete with neighboring states. The funding limitation is a factor in the second most common justification of hiring difficulty, which was reported most in large, small, and rural districts. Six districts reported all three justifications; this includes all districts in the large grouping, two in the rural grouping, and one each in the centralized and small.

## District Grouping Variance Justification

District Grouping	District	Facility	Hiring	Funding	Other
<i>Large</i>	Clark	X	X	X	-
	Washoe	X	X	X	-
<i>Centralized</i>					
	Carson City	X	X	-	-
	Churchill	-	-	X	-
	Douglas	-	-	X	-
	Lyon	X	X	X	-
<i>Rural</i>					
	Elko	X	X	-	-
	Humboldt	-	-	X	X
	Lander	X	X	X	-
	Nye	X	X	X	-
	White Pine	-	X	X	-
<i>Small</i>					
	Lincoln	X	X	X	-
	Mineral	-	X	-	-
	Pershing	-	-	X	-
	Storey	-	X	-	-
<i>Very Small</i>					
	Esmeralda	-	-	-	-
	Eureka	-	-	-	-

### District Level Analysis of Variances

The cited issue for the two most common justifications is a miss match between funding and actual salaries and an inability to hire qualified teachers. Districts cite a lack of funding to provide enough incentives to hire in rural districts and to be able to recruit qualified teachers from competing states.

Carson City is experiencing facility limitations in grades K, 1, 3, and 5. In addition, the district is experiencing difficulty hiring in in grades K-5. There is a shortage of qualified teachers, and recruitment has been difficult, but ongoing. In regards to funding, Carson City is dependent on DSA and CSR dollars to fund teachers to comply with NRS 388.720. If the ratios are one or two students above the prescribed ratios, it is not fiscally neutral to hire an additional teacher to meet the ratios.

Bordewich Bray 1<sup>st</sup> and 5<sup>th</sup> grade variance has two Special Education teachers and one English as a Second Language teacher assigned to support inclusion. In addition, two self-contained Special Education classrooms reduce teacher-student ratios for grades 1 and 2. A Literacy coach and Math coach along with Music, Technology, and Physical Education teachers support classroom instruction. These licensed full time equivalents (FTE) assigned to Bordewich Bray are not accounted for in the teacher-student chart at the top of the form.

Fritsch Elementary School has the additional systems in place to support academic achievement for the 2018-19 school years: Homeroom teachers teach core content areas; music, P.E.

technology teachers, and the librarian provide support systems & teachers outside of core content. Two Special education teachers and their paraprofessionals provide support to students in core & non-core content areas. One ESL teacher, plus a para professional provides support to EL students above regular classroom instruction.

Churchill sent recruiters to job fairs and despite increasing the number of Kindergarten through 5 grade teachers by 5 for the 2018-2019 school year, have seen a slight increase in overall growth in pre-k through 12. They are continuing to provide an EL specialist and para-educators to support classrooms using an inclusion and pull-out model.

Clark is experiencing all three categories of variance justifications. Elementary schools do not have an adequate number of classrooms to hire additional teachers. Additionally, many schools do not have sufficient physical space to allow for the additional of portable units without impacting playground and parking space.

In regards to difficulty hiring, there is a national shortage of teachers. Teacher education enrollment has dropped 35% between 2009 and 2014. Nevada's higher education teacher candidate programs reported 768 program completers in 2014-2015, a decrease from 950 completers in 2010-2011. The district relies heavily on recruitment from California to fill the shortage created within the state. California's program completion has decline by approximately 21% from 2010-2011 to 2014-2015.

Lastly, if Clark County was able to hire the number of teachers needed to meet the prescribed class size ratios, CSR funding would not cover the salaries and benefits at current levels. Nor would there be sufficient funding to cover the related costs and requirements to supply the additional classrooms.

Douglas is experiencing funding limitations. When the funding shifted from a district-wide average class size reporting to a school-level approach, no new allocations were added to the CSR funding formula to assist with assuring that ratios are met at every grade level. When KCSR was discontinued, it now costs the district an estimated \$77,000-\$80,000 to hire an additional teacher to maintain the 16:1 ratios now prescribed. The district has provided a 4-hour aide to assist in kindergarten classrooms.

Elko is experiencing facility limitations in grades K, 2, and 5. Additionally, they are having difficulty hiring due to being in a rural location and do not have enough funding to provide hiring incentives. Despite SB511 and other grant funding allowing the district to offer \$10,000 signing bonuses in FY16, the district still has 4 positions being filled by long-term substitutes. Lastly, facility limitations in grades K, 2, and 5 do not support hiring an additional teacher.

Esmeralda does not qualify for CSR funding as their baseline ratios are lower than the ratios prescribed by law. For example, Esmeralda's third grade baseline ratio is 15 to 1. Since a district must maintain baseline ratios with non-CSR funded teachers in order to qualify for funds, the baseline ratio of 15:1 is lower the ratio prescribed in law, the district would not require additional funding needed to meet the prescribed ratio of 20 to 1 on the regular plan.

Eureka experienced no class sizes above the prescribed ratios and did not need to request variances.

Humboldt is experiencing funding limitations in grades K, 3, 5, and 6. Current available revenue prevents HCS D from hiring positions in instances in which class size reduction ratios are missed by less than 1 student. Given limited funds, adding personnel, would negatively impact other

identified needs. With Kindergarten no longer falling under CSR, expected ratios should be aligned with prior 21:1 expectations.

Lander reported that there are no additional/empty rooms or buildings available, and that they need to be able to offer more incentives to work in a rural location and the budget does not provide for this.

Lincoln is experiencing difficulty hiring due to being a rural location. The district is unable to provide enough financial incentives to recruit qualified teachers. Lincoln is also experiencing facility limitations in grades K,1,and 3, as the district does not have enough classrooms to be able to hire an additional teacher. Schools were not built to house more than one class per grade.

Lyon is experiencing facility limitations in grades all grades K-6. With the all-day kindergarten and pre-k expansion, the facilities are limited; this limits the ability to hire additional teachers to reduce classes above the prescribed ratios. Additionally, it is not fiscally neutral to hire an additional teacher when the district is one or two students above the prescribed ratio. This is largest contributing factor as it costs \$80,000 to hire an additional teacher.

Mineral reported that due to being a very rural location, it is difficult to recruit and hire new teachers.

Nye stated that due to being a rural location, they have difficulty hiring teachers. Many of their teachers do not live locally and commute, which is a burden. This makes it difficult to offer incentives, as the budget does not allow for this. Additionally, class sizes are often only a little over the target ratio, and therefore, it does not make sense to split a classroom of 20 into 2 with 10 students each. Instead, they will monitor enrollment and provide para-professionals to support where needed.

Pershing has experienced a decline in enrollment, with no growth projected. As the district's enrollment decreases, so does DSA funding. Thus, it is not fiscally neutral to hire additional teachers when ratios are only slightly above the prescribed ratios. The district will continue to monitor class sizes and utilizes para-professionals to provide support.

Storey County asserts that hiring an additional teacher would cost an average of \$60,000, which would cause a financial hardship on their district. With only a slight increase in class size, they are unable to justify hiring a new teacher.

Washoe County cited facility limitations and stated that they are in the process of building 2 new middle schools and 1 new elementary school, which will open in the 2019-2020 school and will allow 6<sup>th</sup> graders to move from the elementary school to the middle school and will relieve the overcrowding. They also stated, that they face a lack of teacher candidates that meet the high quality instruction needed for the students. Additionally, WCSD continues to face an annual structural budget deficit as costs continue to exceed revenues. When the student enrollment by grade for a site slightly exceeds the prescribed ratio, lack of available financial support specifically for the reduction of pupil-teacher ratios prohibits the District from hiring another teacher. However, the District as a whole, typically meets the required ratios.

White Pine cited difficulty hiring, stating that there are no available licensed teachers in the community. They hired one ARL teacher in August after an exhaustive search for a qualified candidate.

## School Level Analysis of Variances

Eleven school districts have variances in 1 and 2 star schools based on the most recent information published December 15<sup>th</sup>, 2017. There are 169 1 and 2 star schools reported schools in the first quarter of FY18. Out of the 169 total 1 and 2 star schools, 160 of those schools have variances with a total of 425 school and grade level variances in grades kindergarten through 6<sup>th</sup> grade as applicable.

There were 365 total schools (1-5 star schools, including unrated schools) of which 342 had variances in the first quarter. Within these schools, there were 698 variances in first through sixth grade compared to 667 in the fourth quarter of fiscal year 2018. Including kindergarten, there were 1,014 variances statewide. Kindergarten variances decreased by 1% from 319 in Q4 of FY18 to 316 in Q1 of FY18. A large proportion of the increase in variances compared to FY17 is directly related to discontinuance of the kindergarten CSR program, which defaulted to a prescribed student-teacher ratio of 16 to 1 in kindergarten per NRS 387.700.

In addition, it is important to note, that due to a methodology change in calculating class size ratios, the class size ratios also slightly increased. The Department is now utilizing average daily enrollment (ADE) instead of average daily attendance (ADA) when calculating the student to teacher ratio in order to align with current reporting procedures. This results in a slightly higher class size ratio due to evaluating total enrollment instead of attendance. Additionally, beginning in FY18, after an audit finding, the Department began evaluating class size ratios to the second decimal place, ie 17 is now reported as 17.32. Since 17.32 is above 17, this would constitute a variance, whereas previously, this would not have registered as a variance. Class size ratios remained relatively flat, with a slight decrease in the number of variances requested of 7 for grades 4-6. First grade experienced moderate increases in the of variances of 26 ( 13.6%). While second and third grade experience small increase of 6 each ( or 2.7% and 2.8% respectively).

### Count of Variances by District in 1 and 2 Star Schools

School District	Total Number of Schools (All Star Ratings, Grades K-6)	Total Number of 1 and 2 Star Elementary Schools	Number of 1 and 2 Star Schools with Variances	% of 1 and 2 Star schools with Variances	Total Number of Variances in 1 and 2 Star Schools (K Only)	Total Number of Variances in 1 and 2 Star Schools (K-6)

### District Level Analysis of Variances

There were 133,179.15 students in grades kindergarten through 6<sup>th</sup> grade in the first quarter. For which, there were 1,875.30 CSR funded teachers and 4,634.11 non-CSR funded teachers for 6,509.41 total teachers. The total aggregate class size ratio is 20.46. The district level class size ratios for the first quarter are listed below by grade. Bolded values exceed the prescribed ratio. All but three districts exceed the prescribed ratios, Eureka, Esmeralda, and Lincoln. The grade with the most variances is kindergarten, with 12 of the 17 districts exceeding the prescribed ratio of 16 to 1 student to teacher ratio. The grade with the second most variances is second grade, with 6 out of 17 districts exceeding the prescribed ratio (17 to 1 for the regular plan, and 22 to 1 for those on the alternative program).

### District Level Class Size Ratios

District	K	1 <sup>st</sup>	2 <sup>nd</sup>	3 <sup>rd</sup>	4 <sup>th</sup>	5 <sup>th</sup>	6 <sup>th</sup>

Total Ave. (State)	20.92	19.03	19.65	21.83	22.26	23.98	22.02

*\* Esmeralda does not qualify for CSR funds due to their baseline ratios being less than the prescribed ratios. The provided figures are purely informational. Alternative plan participants are identified with an "A", while regular plan participants are identified with an "R".*

### Concluding Remarks

In the first quarter of FY19, there was a 3% increase in the overall number of class size ratio variances requested compared to fourth quarter of FY18. Kindergarten variances remained relatively flat with 316 variances compared to 319. This was the second year since the discontinuation of the kindergarten class size reduction program; as a result, kindergarten class size ratio is now 16 to 1 as prescribed in NRS 388.700(1) compared to 21 to 1 in FY17. However, there were limited changes in kindergarten class size ratios compared to FY18. Grades 1 experienced the most drastic changes in class size ratios with the highest percent increase observed in first grade, with an increase of 13.6%, most of which is attributed to Clark County School District and is related to budgetary cuts. Grades 2 and 3 experienced small increases of 2.7% and 2.8% respectively. Whereas, grades 4-6 experienced a 16% decrease in the number variances from 37 to 31 variances.

The attached variance request report is sorted by CSR plan type, school district, and then by school alphabetically. For example, alternative plan participants are grouped first, then alphabetically by district and school. Bolded values identify classrooms over the prescribed ratio; the number listed indicates the actual class size ratio. Each bolded value represents a variance requested by the district. Individual variance requests are available upon request.

The Department is committed to working with the State Board and school districts/charter schools to decrease the number of variance requests, particularly in high need schools. I hope this information is useful to you. If you have any questions, please do not hesitate to contact me via email at [mhanke@doe.nv.gov](mailto:mhanke@doe.nv.gov) or via phone at 775-687-9236.
