Consent Agenda Item Title: Revised 2021 Q3 and Q4 Class Size Reduction Reports

Office Submitting Agenda Item: Student Investment Division

Summary of the Document:

Clark found a reporting error in their Q3 and Q4 data; the Q3 and Q4 2021 reports have been updated accordingly and are for review/approval

Purpose/Impact of the Document:

This document is a report required by NRS/NAC and serves to assess the current state of K-3 class size ratios across Nevada. Ideally this data serves to drive legislative action regarding funding and programmatic initiatives to reduce ratios.

Stakeholder Engagement to Inform Item:

This report is completed using information requested and provided by each school district on a quarterly basis; corrections are made with frequent communication.

MEMORANDUM

TO: Felicia Ortiz, President
Nevada State Board of Education

FROM: Heidi Haartz, Deputy Superintendent for Student Investment

DATE: January 17, 2022

SUBJECT: *REVISED* Report to the State Board of Education: Class Size Reduction Variances and Justifications, 4th Quarter Fiscal Year 2021 (April 1, 2021- June 30, 2021)

In December of 2021, Clark County School District (Clark CSD) notified the Nevada Department of Education that they identified a reporting error in both their quarter three and quarter four CSR reports; specifically, rather than reporting four (4) general funded educators and two (2) CSR-funded educators for a calculated total of six (6) educators, Clark CSD transposed the data and reported their total number of educators (6) and their number of CSR-funded educators (2) for a calculated total of eight (8) educators. This reporting error occurred across all schools and grades in the district and resulted in a significant decrease in variance requests. This report has been updated to accurately reflect the total educators, class size ratios, and variance requests for Clark CSD and its impacts on State CSR reporting. The portions of the report that have been revised have been noted in italics.

Introduction

Pursuant to Nevada Revised Statutes (NRS) 388.700(5), the State Board of Education is required to submit a quarterly report on class size ratios in the elementary grades and each variance requested by a school district when the target ratio is exceeded during the preceding quarter to the Interim Finance Committee (IFC). For the purposes of evaluating the effectiveness of the Class Size Reduction (CSR) program, the report must include an identification of each elementary school for which a variance was granted, as well as the specific justification for the variance. Charter schools are explicitly excluded from the provisions of the Class Size Reduction program. Per NRS, each biennium the legislature allocates funding for school districts to aid in the effort to reduce class size ratios in the elementary grades. Annually, school districts are required to submit a plan with the Nevada Department of Education (NDE), detailing how the awarded funds will be used to reduce class sizes.

There are currently two types of CSR funded plans in Nevada during the 2019-2021 biennium:

- The regular plan focuses on pupil-teacher ratios of 16 pupils per licensed teacher in kindergarten, 16 pupils per licensed teacher in first and second grades, and 18 pupils per licensed teacher in third grade. These ratios are prescribed in NRS 388.700 subsection 1(a).
- The alternative plan, established by the legislature in 2005, focuses on ratios of 16 pupils per licensed

teacher in kindergarten, 22 pupils per licensed teacher in first through third grades, and 25 pupils per licensed teacher in fourth grade. The ratio of 25 pupils per licensed teacher extends to fifth and sixth grades if the fifth and sixth grades are included in the elementary school. The alternative plan may only be implemented in school districts whose population is less than 100,000. This program is defined in NRS 388.720.

School districts are required to report quarterly to the Nevada Department of Education on the average daily enrollment of pupils and the ratios of pupils per licensed teacher for each grade identified under the plan implemented by the district per NRS 388.725. Beginning in 2013, each school that exceeds the target pupil-teacher ratio must request a variance for the next quarter of the school year. Pursuant to NRS 388.700(4), the State Board of Education may grant a variance to a school district for good cause.

Senate Bill (SB) 555 (2019) section 14.1 provides funding for school districts to reduce ratios from the base ratios established in the three years prior to the start of the CSR program in 1991, in first through third grades only. The funded target class size ratios are 17 pupils per licensed teacher in grades 1 and 2, and 20 pupils per licensed teacher in grade 3. SB 555 (2019) section 15 provides funding for a minimum of 1,911 teachers to help school districts attain the required ratios. It is important to note, funding is allocated to school districts to meet required ratios at the district level, not the individual school level. Additionally, SB 555 (2019) allows any remaining funding after the initial allocation to be allocated to the lowest-performing schools with variances.

Summary

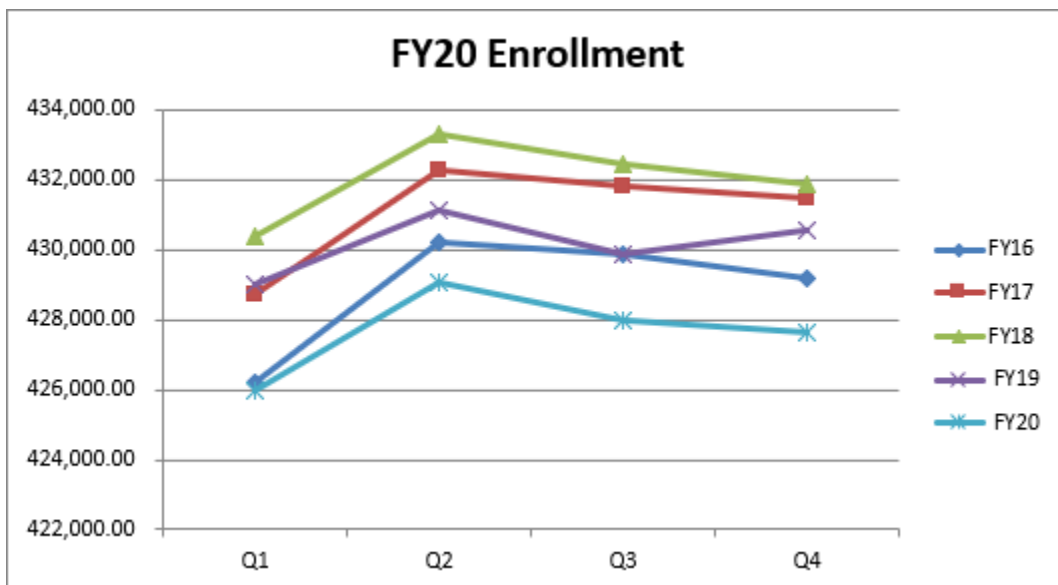

This report provides a list of class size ratio variances requested by each school district at the school and grade level. Additionally, included is a breakdown of the number of variances at the 1- and 2- star school level for each school district. Each variance requested, must include a justification for the variances and a plan of action the school district will take to reduce the ratio of pupils per class as required by Assembly Bill 304. All variance requests and justifications are available upon request. It is important to note, that when calculating the class size ratio, only licensed personnel who teach core curriculum classes can be used in the calculation. Teachers of art, music, physical education, special education, librarians, and specialists cannot be included in the calculation.

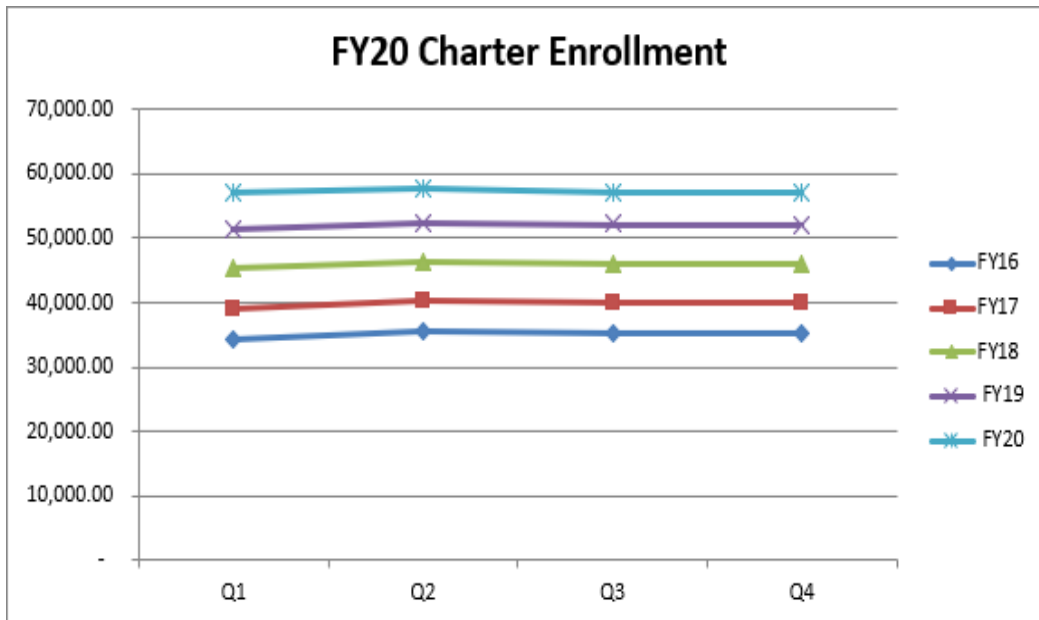

Statewide, enrollment experienced an upward trend in the fourth quarter compared to the third quarter of FY21, increasing by approximately 1,075 pupils from 122,648 to 123,723. The total number of variances requested increased by 18 variances compared to last quarter, from 776 to 794 in grades kindergarten through sixth. The total variance increase was approximately 2%. The number of *kindergarten variances increased by 4, from 280 to 284, and first grade* saw the largest variance increase by 11, *from 157 to 168*. While most grades had an increase in variances and saw correlating increases in their overall class size ratios, second grade and sixth grade both saw small decreases in their class size ratios, with *sixth grade shifting from a ratio of 19 to 1 to 18 to 1*. Statewide, the average class size ratio was 19 to 1 based on 123,723 students and 6,437 teachers.

The chart below provides a side-by-side comparison of the variance requests for first quarter through fourth quarter FY20.

In Q4 FY 2021, we continued to see the trend of lower enrollment at the school district-level and increased enrollment at the charter school level. Based on audited FY20 quarterly average daily enrollment reports, district-level reported enrollment declined an average of 0.61% across all grades compared to FY20. Meanwhile, charter school enrollment grew nearly 10.3% during the same time period, as seen in the charts below.

Analysis of Variances

During the fourth quarter of FY21, 323 elementary schools reported a grade level exception and exceeded the target ratio associated with the plan. Based on 377 reporting schools, this equates to 86% of the elementary schools experiencing a variance. However, when excluding the number of kindergarten variances, this percentage drops to 250 elementary schools, or 66%, reporting a grade level variance. The table below lists the number of variances requested by grade for each district.

Count of Variances by Grade

| District Name | K | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|--------------------|------------|------------|------------|------------|----------|----------|----------|------------|
| Carson | 6 | 0 | 0 | 0 | 0 | 0 | 0 | 6 |
| Churchill | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 |
| Clark | 188 | 136 | 139 | 125 | 0 | 0 | 0 | 588 |
| Douglas | 8 | 4 | 2 | 2 | 2 | 1 | 2 | 21 |
| Elko | 6 | 1 | 1 | 0 | 2 | 0 | 1 | 11 |
| Esmeralda | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Eureka | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 |
| Humboldt | 3 | 1 | 1 | 1 | 0 | 0 | 0 | 6 |
| Lander | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 |
| Lincoln | 2 | 2 | 2 | 1 | 0 | 0 | 0 | 7 |
| Lyon | 8 | 1 | 1 | 2 | 3 | 3 | 3 | 21 |
| Mineral | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Nye | 8 | 2 | 2 | 2 | 0 | 2 | 0 | 16 |
| Pershing | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 1 |
| Storey | 1 | 0 | 0 | 2 | 0 | 0 | 0 | 3 |
| Washoe | 48 | 20 | 20 | 19 | 0 | 0 | 0 | 107 |
| White Pine | 2 | 1 | 0 | 1 | 0 | 0 | 0 | 4 |
| Grand Total | 284 | 168 | 168 | 155 | 7 | 6 | 6 | 794 |

Upon a closer review of the data, 192, or 68%, of the elementary schools with a kindergarten variance had class sizes less than 21 pupils to 1 licensed teacher, meaning that 92 schools, or 32%, exceeded the target ratio by five or more pupils. The largest kindergarten class size was 34 pupils to 1 licensed teacher, while the smallest

kindergarten class size was 4 pupils to 1 licensed teacher. The average statewide kindergarten class size was 19 pupils to 1 licensed teacher.

Particular attention is provided to kindergarten class size ratios due to the impact of legislative changes in recent years that resulted in the elimination of funding and a simultaneous change in the target ratio from 21 pupils to 1 licensed teacher, to 16 pupils to 1 licensed teacher. As a result, the number of variances requested drastically increased due to the change in the target ratio. The table below summarizes the number of schools with variances by the district for all grades.

Number of Elementary Schools with a Variance

| School District | Total Number of Schools (All-Star Ratings) | Total Number of Schools with Variances | % of Total Schools with Variances | Number of Schools with a Variance Excluding Kindergarten | % of Schools with a Variance Excluding Kindergarten |
|-----------------|--|--|-----------------------------------|--|---|
| Carson | 6 | 6 | 100% | 0 | 100% |
| Churchill | 3 | 1 | 33% | 0 | 0% |
| Clark | 231 | 213 | 92% | 187 | 81% |
| Douglas | 7 | 8 | 100% | 6 | 75% |
| Elko | 13 | 8 | 62% | 5 | 38% |
| Esmeralda | 3 | 0 | 0% | 0 | 0% |
| Eureka | 2 | 1 | 50% | 0 | 0% |
| Humboldt | 9 | 3 | 33% | 1 | 11% |
| Lander | 2 | 1 | 50% | 0 | 0% |
| Lincoln | 4 | 3 | 75% | 3 | 75% |
| Lyon | 12 | 9 | 75% | 8 | 67% |
| Mineral | 2 | 0 | 0% | 0 | 0% |
| Nye | 11 | 8 | 73% | 4 | 36% |
| Pershing | 2 | 1 | 50% | 0 | 0% |
| Storey | 2 | 2 | 100% | 2 | 100% |
| Washoe | 64 | 57 | 89% | 34 | 53% |
| White Pine | 4 | 2 | 50% | 1 | 25% |
| Total | 377 | 323 | 86% | 251 | 67% |

When reviewing first through sixth-grade class sizes, 166 or 33% of the class size variances reported exceeding the target by more than five pupils. In districts that chose to implement the regular plan, 158 classes exceeded the target ratio by more than five pupils, and the largest class size ratio reported was in *third grade at 39* pupils to 1 licensed teacher, in Clark County School District. In districts that chose to implement the alternative ratio, 8 classes exceeded the target ratio by more than five pupils, and the largest class size ratio reported was 37 at the sixth-grade level in Douglas County School District.

When reviewing class size ratio variances, nine school districts have variances in 1- and 2-star schools based on the most recent Nevada Educator Performance Framework (NEPF) ratings published in September of 2019. Due to COVID-19, star ratings were delayed and the 2019-star ratings were used as a proxy. Of the 168 1- and 2-star elementary schools included in the quarterly report, 139 of the schools have variances with a total of 261 grade level variances. Kindergarten accounts for 121 of the variances, with first, second, and third grade each accounting for 45, 46, and 44 of the variances, respectively. Finally, fourth through sixth grades make up the remaining 8 variances.

Underperforming Schools with a Grade Level Variance

| School District | Total Number of Schools (All Ratings) | Total Number of 1- and 2-Star Elementary Schools | Number of 1- and 2-Star Schools with Variances | % of 1- and 2-Star schools with Variances | Total Number of Variances in 1- and 2-star schools |
|-----------------|---------------------------------------|--|--|---|--|
| Carson | 6 | 0 | 0 | 0% | 0 |
| Churchill | 3 | 0 | 0 | 0% | 0 |
| Clark | 231 | 110 | 99 | 90% | 200 |

| Washoe | 64 | 24 | 20 | 83% | 27 |
| White Pine | 4 | 3 | 2 | 67% | 4 |
| Total | 377 | 168 | 139 | 83% | 261 |

District-Level Overview of Class Size Ratios

Based on the fourth-quarter reports, 12 of the 17 districts reported class size ratio variances at the district level. Of the 17 districts, 7 districts exceeded the target class size ratio at the district level in kindergarten only. The largest deviation from the target was in sixth grade and was 33 to 1 in Douglas County. *The numbers in bold below indicate averages above the target class size ratio.*

| District Name/Plan | K | 1 | 2 | 3 | 4 | 5 | 6 |
|--------------------|-----------|-----------|-----------|-----------|-----|-----|-----------|
| Carson-Alt | 21 | 20 | 20 | 21 | 21 | 23 | N/A |

School Level Overview of Class Size Ratios

Provided in the following sections is an overview of each school district's annual class size reduction plan, the justification for variances, as well as the district's plan of action to reduce class sizes when a variance occurs. Additional school level information such as star rating and student demographic information like percent of the school population that is identified as English Learners (EL) and Free and Reduced Lunch (FRL) eligible is also included. Please note that in the event that an identifier equals 10% or less of the reported values, the data is suppressed to protect student information and is denoted by an asterisk "**".

Carson City

Carson City School District (CCSD) implemented the alternative class size reduction program for first through fifth grades. In developing their plan, they utilized existing class sizes to project staffing needs into the new school year and hired accordingly to meet the target ratios.

Additionally, CCSD hired certified music, P.E., and technology teachers, which reduces the burden on grade level teachers. Special focus was directed to 1- and 2- star schools, Empire Elementary and Fremont Elementary, which were allocated an additional first-grade teacher in order to ensure compliance with the target ratios.

At the start of the school year, CCSD continued to monitor class size ratios every day for the first 10 days of school in order to mitigate significant increases. CCSD will continue to monitor class sizes monthly. When the district developed and submitted their plan, with the exception, of each kindergarten class, only one grade exceeded the target class size ratio, which was a fifth-grade class with a ratio of 26 pupils to 1 licensed teacher. The average estimated kindergarten class size ratio was 22 pupils to 1 licensed teacher, and the maximum

kindergarten ratio was 26 pupils to 1 licensed teacher. At that time, CCSD estimated nine grade-level variances.

For the fourth quarter, CCSD requested 6 variances. CCSD’s largest class size ratio is 24 pupils to 1 teacher in a fifth-grade class. The smallest, largest, and most commonly occurring class sizeratios are summarized in the table below as well as the average class size ratio in each grade andeach school. The largest kindergarten class size is 22 pupils to 1 licensed teacher at Seeliger Elementary.

| | K | 1 | 2 | 3 | 4 | 5 |
|------------------------------|----|----|----|----|-----|-----|
| Smallest Class size ratio | 19 | 18 | 19 | 19 | 18 | 22 |
| Largest Class size ratio | 22 | 21 | 21 | 22 | 23 | 24 |
| Most Common Class size ratio | 21 | 21 | 21 | 21 | N/A | N/A |

| School Name | Star Rating | FRL | EL L | K | 1 | 2 | 3 | 4 | 5 |
|---------------------------|-------------|------|------|----|----|----|----|----|----|
| Bordewich Bray Elementary | 3 | 43% | 14% | 19 | 18 | 19 | 22 | 18 | 23 |
| Empire Elementary | 3 | 100% | 44% | 19 | 21 | 20 | 22 | 20 | 22 |
| Fremont Elementary | 3 | 52% | 28% | 21 | 19 | 21 | 21 | 21 | 23 |
| Fritsch Elementary | 4 | 34% | 16% | 21 | 21 | 21 | 21 | 22 | 24 |
| Mark Twain Elementary | 4 | 100% | 31% | 21 | 21 | 21 | 19 | 19 | 23 |
| Seeliger Elementary | 5 | 36% | 17% | 22 | 21 | 19 | 19 | 23 | 22 |

Churchill

Churchill County School District (Churchill CSD) implemented the alternative class size reduction program for first through fifth grades. In developing their class size reduction plan, Churchill CSD used grade level average daily attendance (ADE) data and the anticipated number of teachers per grade level to predict the district’s class size ratios and anticipated number of variances. The district will increase the number of teachers as funds allow in the upcoming years. Reports provided to the Board of Trustees each month, monitor class sizes and at the end of every year, administration looks at the projection for enrollment to determine which grade levels may need more or less teachers to meet the required ratios.

When the plan was developed, one class size variance was projected for kindergarten and third grades. The kindergarten variance exceeds the target ratio by six students, while the third-grade class exceeds the target by less than one student. When providing justification for the variances, Churchill CSD cited difficulty recruiting qualified teachers to fill open positions and increased enrollment of approximately 40 students. To address potential gaps with larger class sizes, Churchill CSD will provide an EL specialist and para-educators to support an inclusive and pull-out model.

For the fourth quarter reporting period, Churchill CSD requested one variance. The variance requested was in a kindergarten class at Lahontan Elementary School and was 21 pupils to 1 licensed teacher.

| | K | 1 | 2 | 3 | 4 | 5 |
|------------------------------|-----|-----|-----|-----|-----|-----|
| Smallest Class size ratio | 21 | 19 | 18 | 20 | 25 | 23 |

| Lahontan Elementary School | Not Rated | 53% | * | 21 | 19 | | | | |
| Numa Elementary School | Not Rated | 51% | 12% | | | | | 25 | 23 |

Clark

Clark County School District (Clark CSD) implemented the regular class size reduction program for grades first through third. Within the approved plan, CCSD prioritized staffing in the following manner:

Underperforming schools (1- and 2- star schools)

Kindergarten: 21:1 1st Grade: 17:1 2nd Grade: 17:1 3rd Grade: 20:1

Remaining schools (3- star and above)

Kindergarten: 21:1 1st Grade: 19:1 2nd Grade: 19:1 3rd Grade: 22:1

In developing the staffing allocations, district staff from the budget department and human resources division utilized a formula to distribute CSR units to 1- and 2- star schools. Additionally, the school district will use supplemental funds to reduce the number of 1- and 2-star schools requiring a variance.

Clark CSD initially estimated they would experience 766 grade-level variances. During the *third*-quarter reporting period, they requested 577 variances. The largest class size was in the third grade: 37 pupils to 1 licensed teacher. The largest kindergarten class size ratio was 33 to 1. Clark CSD cited a national teacher shortage of 110,000 as one reason for the variances requested. Clark CSD experienced 813 classroom vacancies, 417 of which were at the elementary school level. Additionally, Clark CSD cited an insufficient number of classrooms to be able to meet the target ratios, advising that additional portable classrooms would need to be purchased.

The district's plan of action to reduce the requested variances will be to monitor the Nevada State Performance Framework (NSPF) star ratings of each school. When a school's star rating declines, the school will either increase class sizes at the fourth and fifth-grade levels in order to allocate an additional teacher at the designated level or receive an additional teacher allocation to meet the target ratio. Due to funding levels, and availability of teachers, 3-, 4-, and 5- star schools whose star rating remains the same or increases, will gradually reduce staffing to CSR level averages.

For the fourth quarter reporting period, Clark CSD requested a total of 588 variances. Clark CSD's largest class size was 39 pupils to 1 licensed teacher in a *third-grade* class.

Douglas

Douglas County School District (DCSD) implemented the alternative program for first through sixth grades for the 2020-2021 school year. DCSD also chose to prioritize its lowest-performing schools first when addressing class size ratios, as well as assign additional teachers to multi-grade classrooms. The district will monitor class sizes quarterly, but because enrollment is not expected to increase, staffing allocations will be reviewed in August and adjusted as needed.

Additionally, the school district indicated that with the shift in reporting from the district level to the school level and without an equivalent shift in funding, it has disproportionately increased the focus to the individual school level. If the district hired sufficient staff to eliminate every variance, it would not be a fiscally neutral

solution. Hiring an additional teacher to reduce a class of 24 students to two classes of 12 would over-correct the variance and would create a financial burden on the district.

During the fourth quarter reporting period, DCSD requested 21 variances. The largest class size ratio was in a sixth-grade class, 37 pupils per 1 licensed teacher. The largest kindergarten class was 31 pupils to 1 licensed teacher. The school district has identified Minden Elementary School as the overflow school when kindergarten classes exceed a 25 to 1 ratio. As new kindergarten students are enrolled, they are assigned to attend Minden Elementary. It is important to note that the class size ratios reflect ratios for Douglas Nevada Online School. Douglas Nevada is an online school and therefore, class size ratios are for the online students. These students do not attend school in a physical classroom.

Elko

For the 2020-2021 school year, Elko County School District (ECSD) chose to implement the alternative class size reduction program in first through sixth grades. The district attempted to shift staffing allocations and funding to meet the updated kindergarten class size ratio requirement of 16 pupils to 1 licensed teacher. However, due to teacher shortages, target ratios could not be achieved at each school. ECSD currently utilizes nine long-term substitute teachers in K-6 core elementary classes and two permanent positions. The school district will continue to monitor kindergarten enrollment continuously and efforts will be made again in FY21 to increase staffing allocations to comply with the target ratios.

Within the fourth quarter reporting period, ECSD requested 11 variances. ECSD's largest class size was in a fourth-grade class at 27 to 1. The largest kindergarten class size was 26 pupils to 1 licensed teacher. The district attempted to recruit sufficient staff to meet the ratios in all grades, however, the current teacher shortage hindered these efforts. The school district is utilizing long-term substitutes to fill the vacancies, which are not reflected in the ratio calculation.

Esmeralda

Esmeralda County School District (Esmeralda CSD) does not qualify to receive class size reduction funding because their base ratios are less than the established target ratios. As a result, they are excluded from the requirement to submit a class size reduction plan. However, the quarterly reporting requirement is still observed.

For the fourth quarter of the reporting period, Esmeralda CSD's largest class size ratio was 12 pupils per teacher. The district has no additional reporting requirements at this time.

Eureka

Eureka County School District (Eureka CSD) chose to implement the alternative class size reduction program for first through sixth grades. For the fourth quarter reporting period, the district requested one variance for a kindergarten class with the ratio being 27 pupils to one licensed teacher at Eureka Elementary. This was also Eureka CSD's largest class.

Humboldt

Humboldt County School District (HCSD) chose to implement the alternative class size reduction program for grades first through sixth. In developing their plan, they estimated they would experience ten variances at the school level. Due to the high variability Humboldt experiences in enrollment, the district did not feel that hiring

the additional required staff would be fiscally responsible.

The district will monitor enrollment patterns and will adjust staffing as possible to further reduce the number of grade levels identified as out of compliance. HCSD will implement contract language to shift positions and address class sizes that may be higher than anticipated. This will then be tracked on a quarterly basis and addressed as defined in the collective bargaining agreement to rectify, as possible.

In HCSD's fourth quarter report, 6 variances were requested. Their largest reported class size ratio was in fifth grade and was 25 pupils to 1 licensed teacher. Their largest kindergarten class size was 23 pupils to 1 licensed teacher. HCSD states that current available revenue prevents the district from meeting the kindergarten CSR requirements of 16:1 and that adding personnel would negatively impact other identified needs.

Lander

For the 2020-2021 school year, Lander County School District (LCSD) chose to implement the alternative class size reduction program in first through fifth grades. The district projected one class size variance would be requested for kindergarten.

For the fourth quarter reporting period, one variance was requested in kindergarten at Battle Mountain Elementary and the class size 21 to 1 at Battle Mountain Elementary School. The district cited lack of classrooms and insufficient funds to provide incentives to hire additional teachers as the justification for the variance. The district noted that since they are close to meeting the class size reduction requirements, it would not be fiscally neutral to hire additional staff to reduce the ratios further. As a result, the district will continue to monitor enrollment and will adjust as needed.

Lincoln

Lincoln County School District (Lincoln CSD) chose to implement the regular class size reduction program for first through third grades. The district estimated that eight grade-level class size variances would be needed; however, as the district met all of the target ratios at the district-level with the available funding, the district would provide additional assistance as needed to those that exceed the target ratios at the school level.

Lincoln CSD requested seven class size variances in the fourth quarter report. The largest class size was 25 pupils to 1 licensed teacher in a first-grade class. The largest kindergarten class was 22 pupils to 1 licensed teacher at Panaca Elementary. The justification for the variance was an increase in student enrollment, classroom space limitation, difficulty hiring due to rural location, and limited funding. The district provides paraprofessionals to assist during instructional times in classes that exceed the target ratio.

Lyon

For the 2020-2021 school year, Lyon County School District (Lyon CSD) chose to implement the alternative class size reduction program in first through sixth grades. The district estimated they would request 20 grade-level variances which are the result of facility limitations, difficulty hiring in a rural location, and remaining fiscally neutral in instances where the target ratio is exceeded by only a few students. Lyon CSD reviews average daily attendance on a quarterly basis and analyzes the ratios to determine if allocations should be modified, moved to different grade levels, or added to school allocations. Based on the trends in student attendance, the district considers the time of year, location of schools, the NSPF rating, and the ability to hire teachers.

In the fourth quarter report, the district requested 21 variances. The largest class size was 34 pupils to 1 licensed teacher in a fifth-grade class. The largest kindergarten class size was 23 pupils to 1 licensed teacher; eight of the requested variances were attributed to the kindergarten grade-level. The district noted that enrollment figures have remained relatively stable and anticipate hiring additional teachers if enrollment increases.

Mineral

Mineral County School District (MCSD) chose to implement the alternative program for first through sixth grades in the 2020-2021 school year. The district estimated that they would request one grade-level variance. However, the district was able to use the provided funding to meet the target ratios at the district level as required. Thus, additional action to reduce individual class sizes further to eliminate variances, would not be fiscally neutral.

In the fourth quarter report, the district did not request a variance. The largest class size was 42 pupils to 1 licensed teacher, which occurred in the first and third grade. The largest kindergarten class size was 32 pupils to 1 licensed teacher. MCSD cited difficulty hiring due to being in a very rural location as the reason for the variance. The district also notes that with the current Covid 19 fiscal restraints, funding will be a serious limitation.

Nye

Nye County School District (NCSD) implemented the alternative class size reduction program for grades first through fifth. The district estimated they would request 23 grade-level class size variances, 8 of which would be in kindergarten classes. The district's plan to reduce classes is to focus on meeting target ratios at the district level first. Secondly, the district will monitor first through third grades in Pahrump and allocate additional teachers as funding permits. Fourth and fifth grades and remote rural areas will be the third and fourth priorities and kindergarten will be the last priority.

NCSD allocated positions to meet the district goal except for kindergarten which will take more time to secure the resources (classroom space and additional full-time teaching positions) needed to meet the target. NCSD purposely allocated teachers and created combination classes so the district would have room to grow with their district ratios. NCSD utilizes their Average Daily Attendance (ADA) reports, and an estimate of ADE will be made every month. The CSR report will be updated every school month with ADA numbers to anticipate variances. Any ratios that exceed the base or target ratios, will be accompanied by increases in ADE which will support additional teacher allocations. These will then go before our monthly Board of Trustee meetings for approval.

NCSD requested 16 grade-level variances in fourth quarter. The largest class size ratio was 30 pupils to 1 licensed teacher in a fifth-grade class. The largest kindergarten class size ratio was 23 pupils to 1 licensed teacher. The district cited difficulty hiring due to remote locations as an obstacle. NCSD has noted that they

have opened two new kindergarten classes in the second quarter and will continue to strenuously recruit to open more classrooms before winter break. If the district is not able to recruit new teachers, then paraprofessionals will be used in the most impacted classrooms to reduce the student to teacher ratio.

Pershing

Pershing County School District (PCSD) applied for the regular class size reduction program for grades one through three. The district estimated they would request two grade-level variances and advised that due to funding limitations, no additional staffing would be hired beyond the allocations provided under the CSR grant. In the event enrollment increases, paraprofessionals will be used to support students in core subject areas.

PCSD requested 1 grade-level variances in their fourth quarter report and cited funding limitations due to increasing enrollment as the justification. The district's largest class size is found in a one classroom school, which has one teacher for a total of 20 students in the third grade. As noted previously, a lack of funding prevents the district from reducing class sizes further.

Storey

For the 2020-2021 school year, Storey County School District (SCSD) chose to implement the alternative class size program for grades first through fifth. The district estimated they would request two class size variances in second and fifth grades. The district will use the available funds to extend the time of a certified teacher by 40% and hired a classroom aide to assist students in overcrowded classrooms.

SCSD requested 3 class size variances with the largest variance being 26 pupils to 1 licensed teacher in a third-

grade class. The district will continue to monitor class sizes and will look at hiring an additional teacher that may be used across affected grade levels.

Washoe

Washoe County School District (WCSD) implemented the regular class size reduction program for grades first through third. In order to achieve the target ratios, WCSD utilizes enrollment projections developed by schools and applies the target staffing ratios at all 1- star schools to ensure ratios do not exceed the funded targets. This also serves to ensure ratios meet the target at the district-level. Additionally, the district has built two new schools and rezoned most sixth- grade classes from elementary to middle schools in an effort to relieve overcrowding.

WCSD notes that in some instances, a lack of physical capacity to reduce class sizes further still exists. In these instances, team teaching will be employed. However, the district acknowledges this is not ideal. Additionally, WCSD strives to employ as many highly effective teachers as possible, believing this is the single most important factor in student success. The district estimated they would need to request 134 class size variances for the 2020-2021 school year and plans to actively monitor student enrollment throughout the year. If significant enrollment growth occurs, additional staffing will be allocated to ensure adherence to the target ratios.

In their fourth quarter report for the 2020-2021 school year, WCSD requested 107 grade-level variances. The largest class size ratio was in a third-grade class and was 30 pupils to 1 licensed teacher. As previously noted, the WCSD has built two new schools, which will provide rezoning of overcrowded schools. WCSD noted that updated NSPF ratings identified a higher number of 2-star schools this year, which has impacted the district's ability to focus on funding as efficiently on underperforming schools. In order to minimize adverse effects on other schools, the district did strictly adhere to eliminating variances in underperforming schools. The district will review and seek to revise staffing allocations during the FY21 budgeting process. WCSD advised that they are experiencing a structural deficit as costs exceed revenues and the district is projecting flat enrollment growth; therefore, few changes in variance requests are anticipated.

White Pine

For the 2020-2021 school year, White Pine County School District (WPCSD) chose to implement the alternative plan for grades first through sixth. The district estimated they would request four variances for the kindergarten grade level. The district noted that with the available funding provided under the CSR grant, WPCSD can meet all the target ratios at the district-level, with the exception of kindergarten. The district currently has an Alternative Route to Licensure (ARL) teacher on staff to support the kindergarten class, this teacher is not included in the class size ratio calculation, so the ratio is reported as a variance. Additionally, the district cited lack of revenue makes it difficult to add an additional kindergarten class and that the district has support staff in classrooms with ratios above the target.

WPCSD requested 4 grade-level variances for the fourth quarter. The highest ratio was 25 pupils to one licensed teacher in a fourth-grade class. The highest ratio for kindergarten was 22 pupils to one licensed teacher at Lund Elementary.

Concluding Remarks

In the fourth quarter of FY21, there was an increase of 18 variances requested compared to the third quarter of FY21. First grade saw the greatest increase in variances from quarter three, from 157 to 168. The total number of students reported in kindergarten through sixth grade for this period was 123,723. There were 6,437 teachers, which puts the statewide average class size ratio at 19 for the quarter.

The Department is committed to working with the State Board of Education and school districts to decrease the number of variance requests, particularly in high need schools. I hope this information is useful to you. If you have any questions, please contact Amelia Thibault via email at acthibault@doe.nv.gov or by phone at 775-687-2451.
